**Arecont Vision Joins Leading Suppliers Intransa and OnSSI
With A High Definition IP Road Show Series.**

Half-Day Sessions At Local Anixter Offices Highlight High Def Video.

Glendale, CA (August 25, 2010) – Arecont Vision, the industry leader in IP-based megapixel camera technology, is joining forces with other leading IP video suppliers to present a series of High Definition IP road shows in six cities in the United States and Canada. Half-day, hands-on sessions will highlight the effortless integration of powerful video surveillance solutions that combine the advantages of megapixel video resolution with the system flexibility, scalability and functionality of networked systems based on Internet Protocol (IP).

“Our High Def, Zero Guesswork road show is a great opportunity for end-users and integrators to experience first-hand how three leading industry technology platforms work together,” said Jason Schimpf, Partner Relations Manager, Arecont Vision. “Our concise half-day event will combine hands-on sessions and open discussions with an opportunity to see product line demonstrations.”

Working with Arecont Vision to deliver the road show presentations are Intransa, a supplier of server and storage solutions; and OnSSI, a provider of recording and management software. The sessions will be hosted by Anixter, a leading global distributor of security, communications and electrical products.

“We are pleased to participate and demonstrate how our physical security optimized server and storage appliances in the Intransa VideoAppliance family integrate leading video management software and megapixel cameras, providing a superior, more reliable and more affordable overall solution,” said Bob Gitre, Senior Director of Channel Development, Intransa. “The emphasis will be on how these technologies can be easily integrated for the benefit of better customer solutions, and it’s a great opportunity to meet with the manufacturers and see the complete solution in actual use.”

“Networked IP video systems are increasing the usefulness and transforming the functionality of physical security,” said Yitzhak Zahavy, Partner Marketing Manager, OnSSI. “Multiple technologies are contributing to a complete overhaul in system design, and our road shows will be a great opportunity to show how easily these technologies can be incorporated into a unified IP-based security system.”

The road show kicks off on August 26, 2010 with shows in both Denver, CO and Dulles, VA / Washington, DC. The following four stops on the map include Edmonton, AB, Toronto, ON, Orange County, CA and Detroit, MI. For dates and more information, please visit Arecont Vision's, Intransa's or OnSSI's website.

About Arecont Vision

Arecont Vision is the leading manufacturer of high-performance megapixel IP cameras and associated software. Arecont Vision products are made in the USA and feature low-cost massively parallel image processing architectures MegaVideo® and SurroundVideo® that represent a drastic departure from traditional analog and network camera designs. These

innovative technologies enable Arecont Vision to deliver multi-megapixel digital video at IP VGA camera price points.

About Intransa

Intransa, Inc., the VideoAppliance™ Company, delivers simple and scalable installer-ready appliances, purpose-built for the demands of physical security and industrial video. Intransa VideoAppliance™ sets itself up automatically in under 5 minutes, and is ready for activation of video management software from the leaders in the industry. Our ground-breaking technology eliminates the complexity, cost and ongoing support challenge of integrating commodity servers, storage and hardware, replacing them two-for-one with scalable appliances. That's why Intransa VideoAppliance was named *2010 Winner, Best in Video Storage & Distribution* by the Security Industry Association at ISC West, and earlier as *2009 New Product of the Year at ASIS International*. Please visit us at www.intransa.com to learn more.

About OnSSI

With over 30,000 installations around the world and more citywide deployments than any other video surveillance software solution, OnSSI is the choice of security and IT professionals. OnSSI's solutions fit needs of all sizes and enable users to choose best-of-breed components, grow with their needs over time and increase productivity and efficiency in order to help security professionals keep their facilities safer more easily.
