Dortronics Emergency Pull Stations Offer Multi-Purpose Functionality

Single Pull Action for Quick Egress and Alarm Activation

Anaheim, CA (September 28, 2015) – At ASIS 2015, [Dortronics Systems, Inc.](http://DortronicsSystems.com) (booth #331), the industry's leading provider of standard and custom finish access control products, is showcasing its Emergency Pull Station series designed to make it easier for occupants to quickly exit a building.

Ideal for use in hospitals, schools and industrial facilities, and with a variety of door access systems, the [6510-S35](#) features a single pull action to provide instant egress and alarm activation in the event of an emergency situation. The [6510 COV](#) plastic cover discourages improper activation while providing moisture protection during wash-down operations.

"In an emergency, time is of the essence and safety is of the utmost importance. Our Emergency Pull Stations can be used for emergency egress with interlock or mantrap systems or even as an override to an access control system, making it easier for occupants to exit a building," said Bryan Sanderford, National Sales

Manager, Dortronics Systems, Inc. "They can also be installed quickly and easily and are just as easy to operate for maximum safety and security."

Designed with dual SPDT switches, one set of contacts breaks the lock power when activated and a second set of contacts allows connection to an alarm or access control system. The unit mounts to a standard single gang electrical box and wiring is accomplished by utilizing the screw terminals on the back of the unit to connect to any system or device. System reset is as simple as inserting the supplied key and installing a new acrylic break rod.

The 6510-S35 is often combined with the 6510 COV which features an anti-tamper cover made from clear, super tough polycarbonate. The 6510 COV can be outfitted with optional enhancements including a Piezo sounder that emits a piercing 95 dB or 105 dB warning horn. Also available as options are a set of SPDT contacts to communicate with any card access system when the cover is opened. Weather proof gaskets are optional for outdoor installations. All models of the 6510 Pull Station are available in three colors and custom text availability.

For more information on Dortronics' extensive line of access control products call toll free 1-800-906-0137, e-mail sales@dortronics.com or visit their website www.dortronics.com.
