**New Dortronics 4800 Series Smart Interlock Controller Combines  
Versatility with Economy**

*Offers Field Selectable Door Sequencing with Ample Features for up to Five  
Doors*

Las Vegas, NV (April 6, 2016) – Dortronics has expanded their line of Smart Interlock Controllers with today's introduction of the new highly versatile and economical 4800 Series here at ISC West (booth #1037). The new 4800 Series can be user configured in the field to accommodate up to five doors with ample flexibility for various input/output configurations.

"We are seeing more and more projects utilizing interlocking door controls to increase facility security," said Bryan Sanderford, National Sales Manager, Dortronics Systems, Inc. "Our new 4800 Series addresses these concerns with a user configured solution that offers features and benefits often found only in more complex and expensive controllers."

The 4800 Series features twelve field assignable inputs and seventeen configurable relay outputs for maximum flexibility. Additional design features include a unique watchdog

circuit that constantly monitors operation; LED indicators for input-output connection status; voltage spike and surge protection on all outputs; and adjustable propped door, panic release and door unlock timers. The 4800 Series is available as a board only module or complete with a heavy duty 4-amp power supply.
